Sales process, prospect tracking and questionnaires

Français : ../fr/08-suivi-et-processus.md

1. Process stages (conversion)

The `statut` values are kept in French in the tracker so that both teams share one file.

No.	Status (`statut` column)	Entry	Exit	Target time
1	`identifié` (identified)	business spotted (field, referral, form)	first contact made	—
2	`contacté` (contacted)	visit, call or message (with consent)	demo booked, or refusal	7 days
3	`démo fixée` (demo booked)	date confirmed	demo done	7 days
4	`démo faite` (demo done)	report filled in, score computed	pilot offered or follow-up	2 days
5	`pilote proposé` (pilot offered)	trial terms sent	accepted by e-mail, or refusal	7 days
6	`pilote en cours` (pilot running)	onboarding done	D30 review	30 days
7	`proposition` (proposal)	written follow-up proposal sent	accepts / declines	14 days
8	`client` (customer)	first payment confirmed	—	—
—	`perdu` (lost)	refusal or no answer after 2 follow-ups	reason noted (`motif_perte`)	—
—	`plus tard` (later)	interest but not now	dated follow-up	—

Conversion rates to track (KPIs `10`): contacted → demo, demo → pilot, pilot → customer.

2. Prospect tracker

`marketing/trackers/suivi-prospects.csv` (UTF-8, `;` separator, opens in a spreadsheet; an English-header copy is `prospect-tracker.csv`) and the “Prospects” sheet of `trackers/kpi-tableau-de-bord.xlsx`.

Column	Content
`id`	P-0001…
`date_entree`	entry date, YYYY-MM-DD
`etablissement`, `secteur`, `commune`	business, sector, commune
`contact_nom`, `contact_role`	contact name and role
`telephone`, `email`	only if given by the person
`consentement_canal`, `consentement_date`	e.g. `WhatsApp`, `2026-11-03` (empty = no commercial message)
`source`	field / referral / website / event / `partenaire:` followed by the partner’s identifier (`id` column of the partner tracker, e.g. `partenaire:PA-01`)

Column	Content
`score`	grid `04` § 3 (/20)
`statut`	see § 1
`derniere_action`, `prochaine_action`, `date_prochaine_action`	last action, next action, date
`motif_perte`	price / no device / VAT / not now / other
`notes`	no sensitive data

The file holds personal data: access limited to the sales team, retention according to `legal/en/15-retention-policy.md`, never shared publicly.

3. Weekly routine (Monday, 30 minutes)

1. Update statuses; delete the rows of people who asked for it.
2. List the week's actions (`date_prochaine_action`).
3. Compute the KPIs (`10`), compare with the plan's goal (`03`).
4. One decision: what to stop, what to reinforce.

4. Satisfaction questionnaire — mid-trial (week 2, 5 minutes)

1. How many days a week do you use Nhill? (0–1 / 2–3 / 4–6)
2. What helps you most? (till, stock, invoices, reports, activity log, other)
3. What bothers you most? (free answer)
4. Did you have a blocking problem? Was it solved? How fast?
5. Was the training enough for each user? (yes / partly / no)
6. From 0 to 10: would you recommend Nhill to another trader?
7. One thing to change first?

5. End-of-trial questionnaire (D30, 10 minutes)

1. Questions 1, 2, 3 and 6 of the mid-trial questionnaire again.
2. Compared with the start, closing the till takes: more / the same / less time. (Compare with the timed measurement.)
3. Till or stock differences have: increased / stayed stable / decreased / I don't know.
4. What do you spend today to manage your sales (notebooks, spreadsheet, software, a dedicated person)? (free answer, amount optional)
5. At what monthly price would Nhill seem: too expensive to consider / expensive but possible / a good deal / so low you'd doubt the quality? (free amounts, in CDF or USD)
6. Do you want to continue after the trial? (yes / yes, if: … / no: why)
7. Do you agree that we quote your feedback? (no / yes, anonymously / yes, with name). If yes: separate consent to sign, on the exact text (`legal/en/20-testimonial-image-consent.md`). A "yes" in the questionnaire is not enough to publish.

6. Follow-up and referral templates

See `06-message-templates.md` § 3 (follow-up), § 7 (referral), § 9 (end of trial).
