Key performance indicators (KPIs) and dashboard

Français : ../fr/10-indicateurs.md

Tracking file: `marketing/trackers/kpi-tableau-de-bord.xlsx` (sheets “Tableau de bord” (dashboard), “Hebdo” (weekly), “Prospects”, “Partenaires” (partners), “Budget”, “Taux” (rates)) — formulas included, to fill in every Monday. Targets are those of the 90-day plan (`03`).

1. Indicators

Family	Indicator	Exact definition	Source	90-day target
Acquisition	Prospects identified	rows added to the prospect tracker	tracker	150
	Contacts made	status ≥ `contacté`	tracker	90
	Contact → demo rate	demos done / contacts made	tracker	≥ 25 %
	Cost per demo	marketing spend / demos done	budget + tracker	to measure
Activation	Demos done	status ≥ `démo faite`	tracker	25
	Demo → pilot rate	pilots signed / demos done	tracker	≥ 40 %
	Active pilots	pilots with ≥ 4 days of use last week	console (aggregates)	10
	Time to onboard	days between signature and first sale in Nhill	tracker	≤ 3 d
Satisfaction	Average recommendation score	mean of 0–10 answers	questionnaires	≥ 7
	Blocking incidents > 48 h	count	support	0
Revenue	Pilot → customer rate	customers / completed pilots	tracker	≥ 40 %
	Monthly recurring revenue (MRR)	sum of active subscriptions brought to a month, **per currency**	console (transactions)	to set with prices
	Collected	confirmed payments, per currency	console	—
Partners	Partners signed	contracts signed	partner tracker	3
	Share of pilots via partners	pilots with `source=partner` / pilots	tracker	≥ 30 %
Budget	Cumulative spend vs envelope	spend / scenario envelope	budget	≤ 100 %

Rules: amounts are never added across USD and CDF (as in Nhill); a conversion for comparison uses the dated BCC rate of the “Taux” sheet.

2. Weekly reading

Signal	Likely meaning	Action
Many contacts, few demos	message or target	review script `05`, refocus target `04`
Demos without pilots	demo or doubts (price, VAT, devices)	review `07`, list objections

Signal	Likely meaning	Action
Inactive pilots	onboarding or training	support call, on-site visit
Satisfaction < 7	product	escalate problems to development first
