Sales FAQ (answers for the team and partners)

Français : ../fr/15-faq-commerciale.md

Validated answers for version 3.0.0, aligned with the website (`website/src/pages/en/faq.html`) and the compliance matrix. If a question isn't here, don't improvise: "I'll check and answer you in writing."

Question	Answer
How much does it cost?	Nhill is a subscription per business: users, tills and warehouses are included according to the plan. No price is published: you start with the 30-day assisted free trial, then the business receives a written proposal (plan, term, price, currency, payment methods).
Does it comply with the DGI?	Nhill is management software. It is **not an approved or standardised invoicing device**. If you must issue standardised invoices, keep your approved device for your tax invoices; Nhill lets you record their reference for reconciliation.
Does it work without Internet?	No: Nhill needs a connection to record; a mobile connection is enough. A sale cut by an outage can be validated again without being counted twice. For a long outage, a fallback book and entry afterwards.
On which devices?	Nhill Business: Windows 10 and 11 (64-bit), Linux (Debian 13, Ubuntu 24.04), Android 7 and later phones and tablets. Nhill POS: Windows and Linux, with a USB barcode reader if you wish.
Do I need a special printer?	No. The receipt is a 58 or 80 mm PDF, printable on a receipt printer or a regular printer; the A4 invoice prints on a regular printer.
Can the till issue an invoice?	Yes: for each sale, the cashier chooses a receipt or an A4 invoice in the customer's name, identical to the Nhill Business one (same numbering, same notices).
Is my data safe?	Each business is kept separate from the others in the database; encrypted connections; passwords never stored in clear; activity log that cannot be changed; encrypted backups every day. No software is flawless: we have not had an external audit yet, it is planned.
Who sees my data?	You and the people you invite, according to their role. The Nhill team does not see your invoices, customers or products; only overall usage figures, and each consultation is recorded in your log.
Where is the data hosted?	On a server located in France, in the European Union, rented from the host Hostinger; encrypted backups every day. The team accesses it remotely from Kinshasa, over encrypted connections.
Can I get my data back?	Yes, at any time: CSV and PDF exports, even in read-only mode; the account holder downloads the full archive. At the end of the contract, 90 days to export, then deletion.
How many users?	According to the business's plan; during the trial, within the limits shown in the application. Each person has their own account.
I forgot my password.	Employee: the business's administrator gives you a temporary password (Settings › Team), to replace at the next login. Owner or administrator: "Forgot password?" sends a one-time code by e-mail.
Must the password be complicated?	At least 8 characters, not a too-common password. A short phrase is easy to remember. No obligation to change it regularly.
Do you handle several shops?	Several tills and, depending on the plan, several warehouses with stock transfers.
What about accounting?	Nhill produces the sales, payments and expenses journals, receivables and payables, exportable in CSV and PDF for your accountant. It is not general accounting software.
Is Mobile Money integrated?	You record a Mobile Money payment (amount, reference) next to cash, card, transfer and cheque; Nhill does not drive the operators.

Question	Answer
Can I send an invoice to the customer?	The invoice is a PDF in your name; you attach it to an e-mail or a message. On Android, the “Share” button sends it straight to messaging or e-mail.
Several currencies?	Yes: each document has its currency, among 36 currencies (USD, EUR, CDF, XAF, XOF, NGN, KES, ZAR…), with the day’s rate recorded. Totals stay presented currency by currency.
Who are you?	Nhill Solution, publisher of Nhill, based in Kinshasa. We support each business from the demonstration to the first weeks of use. Contact: info@nhill.online; support: support@nhill.online.
Can I become a partner?	Yes: referral, installation and support, training, support of entrepreneurs. Conditions are set in writing before starting. “Partners” page of the website.
