Compliance matrix: marketing website and application (3.0.0)

Français : ../fr/matrice-conformite-site.md

Version	3.0.0 — 28 October 2026
Purpose	every statement of the marketing website (`website/src/pages/fr`, `website/src/pages/en`) checked against the code, the tests or a management decision
Method	reading of the server code, migrations and QML screens; automated tests (`tests/server`, 121 tests of which 120 passed and 1 skipped locally on 28/10/2026); end-to-end runs of the deployment tools on a fresh Ubuntu 24.04 machine in continuous integration
Key	**Verified**: present in the code and, where stated, covered by a test · **Tooled**: the tools exist and are tested, real operation has not started · **Commitment**: human service promise, not verifiable in the code, to be kept by the team · **Fixed**: gap found during this review and fixed

1. Till (Nhill POS)

Website statement	Status	Evidence
Each cashier has an account and sees only their till and session	Verified	roles `cashier` and `cash_manager` (`db/migrations/0009_pos.sql`), assignment `pos_register_users`; tests `tests/server/test_pos.cpp`
Opening with a cash float; sale by touch or with a USB barcode reader	Verified	`client/qml/Nhill/Pos/pages/PosHome.qml` (`openSession`), search field validated by the Enter key the reader sends (`PosSale.qml`)
Several payment methods on one sale (cash, card, Mobile Money, transfer, cheque), change due	Verified	`pos_payment_methods.kind` (`0009_pos.sql`), `PosPayDialog.qml`
Receipt or A4 invoice in the customer's name, same template as Nhill Business	Verified	`document: "invoice"` in `PosPayDialog.qml`; shared templates (task "POS invoices identical to Business"); tests `test_documents.cpp`
Discount above the cap, return, void: approval by a supervisor with their password, valid once	Verified	`pos_approvals` (`0009_pos.sql`), `PosApprovalDialog.qml`, `PosNav.sendApproved`
Cash in and out with a reason, X reading	Verified	`pos_cash_movements.kind` (`cash_in`, `cash_out`), X report (`server/src/services/pos.cpp`)
Blind close, difference calculated and kept in the Z report	Verified	the expected amount is removed from responses before closing (`pos.cpp`, fields `_cash_expected_minor`); closed session immutable (`nh_guard_pos_session`)
58 or 80 mm receipts; F2 and F9 shortcuts	Verified	`receipt_width_mm IN (58, 80)` (`0009_pos.sql`); `Shortcut { sequence: "F2" }`, `"F9"` (`PosSale.qml`)

Website statement	Status	Evidence
A sale interrupted by an outage can be validated again without being counted twice	Verified	idempotency key kept for the retry (`PosPayDialog.qml`, `idempotency_keys`)

2. Invoices, stock, reports

Website statement	Status	Evidence
Quotes, orders, invoices, credit notes numbered by the server with no gap or duplicate	Verified	`doc_type IN ('quote','order','invoice','credit_note')`, `document_sequences` (`0002_business.sql`)
Quote turned into an invoice in one click; a credit note corrects an invoice and restocks	Verified	`POST /api/v1/sales-documents/:id/convert`, `/credit-note` with `restock` (`server/src/services/sales.cpp`)
36 currencies, exchange rate recorded with the document	Verified	36 ISO 4217 codes inserted in `currencies` (migrations); `fx_rate`, `fx_rate_date`, `fx_rate_source` (`0002_business.sql`)
Configurable tax rates (DRC profile: 16 %, 0 %, exempt)	Verified	`tax_rates`, compliance profile `CD`
Field for the standardised invoice reference	Verified	column `fiscal_reference` (`sales_documents`)
Stock per warehouse, transfers, traced movements, threshold alerts, estimated value	Verified	`stock_movements.kind` (`transfer_in`, `transfer_out`, `adjustment`…), `server/src/services/stock.cpp`; dashboard
Catalogue CSV import and export	Verified	`GET /api/v1/products/export.csv`, `POST /api/v1/products/import` (`catalog.cpp`)
Reports: sales, payments, expenses, products with estimated margin, stock movements, receivables, payables; PDF and CSV export	Verified	`server/src/services/reports.cpp` (routes `/api/v1/reports/...`)
Expense receipts (photo or PDF)	Verified	table `objects`, `purpose = 'receipt'`, PNG, JPEG, PDF types
Full data archive for the account holder (CSV, JSON, attachments)	Verified	`GET /api/v1/establishment/export` (`export.cpp`)

3. Team, security, accounts

Website statement	Status	Evidence
Roles: owner, administrator, manager, sales, accountant, read-only, cash supervisor, cashier	Verified	constraint `memberships_role_check` (`0009_pos.sql`)
Business code renewed every 30 days by default	Verified	setting `code_rotation_days = 30` (`0004_reference_data.sql`), job `rotateCodes`
Activity log that cannot be changed, exportable	Verified	only `SELECT, INSERT` rights on `audit_log` (`0003_security.sql`); export (`activity.cpp`)
Disabled employee: their sessions are closed	Verified	`members.cpp` (revocation `member_disabled`)
Forgotten password: temporary password from the administrator; e-mailed code for owners and administrators	Verified	`password_resets.purpose IN ('email_code','forced_change')` (`0011_password_recovery.sql`), `auth.cpp`; tests `test_password.cpp`
Each business's data kept separate	Verified	row-level security forced on 30 tables (`row_level_security` check of `nhill-server setup`); isolation tests
The Nhill team sees only overall figures, each consultation recorded in the business's log	Verified	aggregate functions `0006_activity_and_platform_stats.sql`, audit of consultations
Functions limited to the business's plan	Verified	plan rights (`0012_plan_entitlements.sql`, `entitlements.cpp`); tests `test_entitlements.cpp`
Export possible even in read-only mode	Verified	`read_only` access = consultation and export (`nh_subscription_access`)

4. Devices and languages

Website statement	Status	Evidence
Nhill Business: Windows 10 and 11 (64-bit), Linux (Debian 13, Ubuntu 24.04), Android 7 and later	Verified	Windows builds, `.deb` packages for Ubuntu 24.04 and Debian 13, APK `minSdk 24` (`client/CMakeLists.txt`) in continuous integration
Nhill POS: Windows 10 and 11, Linux	Verified	same builds
Interface, documents and reports in French and English	Verified	`client/i18n/nhill_fr.ts` (0 untranslated string in `scripts/qa/qml-check.py`), bilingual PDF templates
"A mobile connection (3G, 4G) is enough"	Fixed	no bandwidth measurement: "3G, 4G" removed from the FAQ (FR and EN)

5. Data, hosting, retention

Website statement	Status	Evidence
Hosting on a Hostinger server located in France	Tooled	management decision; `deploy/vps` kit tested on a fresh machine; the production server is not deployed yet (no access provided)
Encrypted backup every day	Tooled	`nhill-backup.timer`, `age` encryption, trial restore off the server (`deploy/vps/tests/acceptance.sh`)

Website statement	Status	Evidence
A business's data deleted 90 days after the end of the contract	**Fixed**	no deletion existed: migration `0014_establishment_erasure.sql`, the Nhill Console "Erase…" action and 6 tests (`tests/server/test_erasure.cpp`) added
Website requests deleted after 12 months	**Fixed**	the website said "12 months after the last exchange" while the purge counts from sending: wording aligned with the code (`SITE_RETENTION_DAYS`)
Technical logs: 90 days at most	Verified	journald `MaxRetentionSec=90day`, Caddy `roll_keep_for 2160h`; ended sessions deleted after 90 days (daily job)
No cookie, no tracker	Verified	no `Set-Cookie`, no browser storage, no external resource (`website/assets/js/site.js`; content security policy in `website/backend/deploy/Caddyfile.site`)

6. Service commitments (to be kept by the team)

These promises appear on the website; they do not depend on the software and cannot be checked in the code. Management confirms it can keep them before the website goes live.

Statement	Pages
Demonstration of about 45 minutes, by video call or on site in Kinshasa	home, contact, get started
Onboarding in about half a day (installation, catalogue import, training)	home, free trial, FAQ
30-day assisted trial: weekly check-in, support; limited places	free trial, home
Written proposal before the end of the trial	free trial, terms
At most one news message a month	forms, privacy policy

7. Contacts and domain

Item	Status on 28 October 2026
`nhill.online`	the domain answers over HTTPS (Let's Encrypt certificate valid until 25 January 2027) but shows Hostinger's parked-domain page: the website is not published yet; no HTTP to HTTPS redirect and no HSTS header (`website/tools/check_live.py`, CI report `ci-results/domain-check`)
`info@nhill.online`, `support@nhill.online`	no MX, SPF or DMARC record: these addresses cannot receive mail until e-mail is set up
