Ideal customer profile (ICP) and qualification grid

Français : ../fr/04-icp-qualification.md

1. Ideal customer profile

Dimension	Profile
Activity	retail, hardware store, depot, wholesaler, parapharmacy, service provider with quotes
Location	Kinshasa (Gombe, Limete, Ngaliema, Kintambo, Lingwala, Barumbu, Masina first, depending on the field), then Lubumbashi and Goma
Size	2 to 15 people; 1 to 3 points of sale or tills
Decision-maker	owner or manager present in the shop, who does the till himself or herself in the evening
Equipment	at least one computer (Windows 10/11 or Linux) or an Android 7+ tablet; smartphone; mobile Internet
Tax	not VAT-registered (priority target); VAT payer only if already equipped with a DGI device for standardised invoices
Pain	till differences, theft or stock errors, doesn't know what sells, depends on a trusted seller, lost notebooks
Trigger	opening a 2nd point of sale, hiring sellers, disastrous stock-take, owner's long absence

Personas

- **Mama Nzeba, owner of a grocery shop (4 people)**: spends an hour every evening on the notebook, suspects differences but can't prove them. Wants: to know how much she sold without being there.
- **Patrick, manager of a hardware store (8 people, credit sales)**: customers who pay in instalments, thousands of items. Wants: to know who owes how much and what is left in the depot.

Personas invented to illustrate the profile: they are neither customers nor testimonials.

2. Not a target (for now)

- Businesses requiring Nhill to produce a **standardised invoice** (not certified).
- Activities with no compatible device or connection.
- Pharmacies dispensing prescription medicines (regulatory traceability not covered).
- Large companies requiring ERP integration, full general accounting, payroll.

3. Qualification grid (score out of 20)

Criterion	0 points	1 point	2 points	Weight
Pain expressed (till, stock, seller control)	none	vague	precise, with a recent example	×2
Decision-maker met	no	influencer	decides alone	×2
Compatible equipment	none	smartphone only	computer or Android tablet + Internet	×1
Tax	VAT payer without DGI device	VAT payer with DGI device	not VAT-registered	×1

Criterion	0 points	1 point	2 points	Weight
Availability for onboarding	none	within the month	this week	×1
Size	1 person alone	2 to 3	4 to 15	×1
Referral potential (network, association)	none	a few contacts	active member of an association or market	×1

Maximum: 2×2 + 2×2 + 2 + 2 + 2 + 2 + 2 = 18, plus **2 bonus points** if the prospect has already tried a spreadsheet or software (knows what they want) → 20.

Score	Decision
≥ 14	offer the pilot
9 to 13	demo, then follow up in 2 weeks
≤ 8	keep in the list, inform (with consent)

4. Discovery questions (10 minutes)

1. How do you record your sales today? Who records them?
2. How do you do the till in the evening? How long does it take?
3. The last time the till didn’t add up, what did you do?
4. How do you know an item is about to run out?
5. Do you sell on credit? How do you track what you are owed?
6. How many people sell? Does each have their own access?
7. What devices do you have in the shop? Is the Internet stable?
8. Are you VAT-registered? Do you use a DGI device?
9. What have you already tried (notebook, Excel, software)? What didn’t work?
10. If it worked, what would change for you in a month?

Record the answers in the prospect tracker (`trackers/suivi-prospects.csv`).
