Sales FAQ (answers for the team and partners)

Français : ../fr/15-faq-commerciale.md

Validated answers for version 2.0.0. If a question isn't here, don't improvise: "I'll check and get back to you by [time]."

Question	Answer
How much does it cost?	During the pilot programme: free, no payment method. Prices will be set from the pilot results and published, in CDF and USD, before any invoicing.
Is it DGI-compliant?	Nhill is management software. It is **not certified** for the standardised invoice. If you are VAT-registered, keep your DGI device for tax invoices; Nhill lets you record its reference for reconciliation.
Does it work without the Internet?	No: Nhill needs a connection to record. An operation cut by an outage is retried without being counted twice. For a long outage, a backup notebook, then entry afterwards.
On which devices?	Nhill Business: Windows 10/11 64-bit, Linux (Debian 13, Ubuntu 24.04), Android 7 and later. Nhill POS: Windows and Linux. *(Check the available deliverables before answering.)*
Do I need a special printer?	No. The receipt is a 58 or 80 mm PDF printable on a receipt printer or a standard printer.
Is my data safe?	Each business is isolated from the others in the database; encrypted communications; passwords never stored in plain text; audit log. No software is flawless: we haven't had an external audit yet; it is planned.
Who sees my data?	You and the people you invite. The Nhill team doesn't see your invoices or customers; only overall usage figures, and each view is written to your log.
Where is the data hosted?	[To complete once the host and region are chosen — see `docs/en/legal-parameters.md`.]
Can I get my data back?	Yes, at any time: CSV and PDF exports. At the end of the pilot or subscription, you keep the export.
How many users?	As many accounts as the plan allows; during the pilot, [N]. Each person has their own account.
I forgot my password.	Version 2.0 cannot reset it yet: keep it in a password manager. It's planned for a next version.
Must the password be complicated?	At least 8 characters, not a very common password. A short sentence is easy to remember. No obligation to change it regularly.
Do you handle several shops?	Several tills and, depending on the plan, several warehouses with stock transfers.
What about accounting?	Nhill produces sales journals, payments, expenses, receivables and payables, exportable for your accountant. It is not general accounting software.
Is Mobile Money payment built in?	You record a Mobile Money payment (amount, reference); Nhill does not connect to the operators.
Who are you?	[Presentation of the team and the operating company, with RCCM — to complete.]
Can I become a partner?	Yes: referral, installation, training, support. Terms in a written contract. "Partners" page of the website.
