Nhill 2.0 legal parameters

Français : ../fr/parametres-legaux.md

This document lists **all the legal and tax information to provide** before commercial launch, and where each item must be entered: legal templates, marketing website, Nhill Console and Nhill Business settings. None of these values is known today; **none may be invented**. Detailed analysis and sources: `legal/en/00-legal-research.md`.

> Nothing in this repository is legal advice. The templates must be reviewed by a lawyer admitted to a DRC bar and, for tax matters, by a tax adviser.
