12 — Nhill application licence

Français (version de référence) : ../fr/12-licence-applications.md

> **TEMPLATE — TO VALIDATE.** Text shown at installation (Windows) or shipped with the Linux packages and the APK. Nhill's code is proprietary; its final licence is to be set by the creators (see `README.en.md`, Licence section).

Header	
Jurisdiction	DRC — Ordinance-law No. 86-033 (copyright), Law No. 82-001 (trademarks)
Assumptions	H-01, H-12, H-17
Sources	S12, S13 — see 00-legal-research.md § 7
Clauses to validate	V-01, V-02; ownership of code rights (developers' contracts)
Version	[NUMBER] of [DATE]

1. Software covered

Nhill Business, Nhill POS and Nhill Console (the "Applications"), version 2.0.0 and later, for Windows, Linux and Android, published by [COMPANY NAME] (the "Publisher").

2. Rights granted

The Publisher grants the user a **personal, non-exclusive, non-transferable and free** right to install and use the Applications, only to access the Nhill service under a valid account (trial, pilot or subscription). Nhill Console is reserved for people authorised by the Publisher.

3. Restrictions

Except as permitted by law, the user may not: copy the Applications other than for installation and backup; modify, decompile or extract their code; remove ownership notices; distribute, rent or make them available to third parties.

4. Third-party components

The Applications include components under their own licences, including Qt (LGPL v3, dynamic linking: the user may replace the Qt libraries provided), libsodium (ISC), IBM Plex fonts (SIL OFL 1.1). The list and licence texts are provided with the Applications (`docs/licences-dependances.md`). This licence does not restrict the rights granted by those licences.

5. Updates

The Publisher may release updates; a version that is too old may be refused by the server, which then states the minimum version to install.

6. Warranty and liability

The Applications are provided to access the service under the subscription contract (template 02). Outside that contract, they are provided “as is”. **[TO VALIDATE: V-01.]** Check the SHA-256 digest of every downloaded file before installation (installation guide).

7. End

The licence ends automatically when access to the service ends; the user then uninstalls the Applications.

8. Governing law

Law of the DRC; [Kinshasa/Gombe commercial court] **[TO VALIDATE: V-02]**.
