15 — Data retention and deletion policy

Français (version de référence) : ../fr/15-politique-conservation.md

Header	
Publisher	Nhill Solution, Kinshasa (Democratic Republic of the Congo)
Version	3.0.0 — 28 October 2026
Status	written without review by a lawyer; recommended review point: V-07 (00 § 5). The periods are those published in the privacy policy and applied by the settings shown. The French version is the reference text
Assumptions	H-03, H-14, H-19 (00 § 2)

1. Principle

Data is kept only as long as its purpose requires, then deleted. Deletion also covers backups, from which data disappears as they rotate.

2. Periods

Data	Period	Implementation
Requests received through the website	12 months after sending	`SITE_RETENTION_DAYS=365`, daily purge (`nhill-site-purge.timer`)
IP address fingerprint of the forms	30 days	`SITE_IP_RETENTION_DAYS=30`, same purge
Website anti-abuse counters	2 days	same purge
Contacts collected at meetings and through referrals (prospect tracker)	12 months after the last exchange; data carried into the account if a subscription follows	rows deleted from `marketing/trackers/prospect-tracker.csv` and the tracking workbook at the monthly review
Agreement to receive news	until withdrawal, at the latest until the request is deleted	`python3 -m nhill_site.cli unsubscribe --email …`; register (document 16) for agreements collected outside the website
Consents to use a name, testimonial or image (document 20)	while the content is used, then until the end of the claim period (V-07)	administrative records; register of document 20 (withdrawal date, date the content was removed)
A business's data (accounts, customers, products, documents, stock, payments, activity log, support requests)	term of the contract, then 90 days of read-only export	permanent deletion from the administration console, possible only after these 90 days (article 3)
The business's accounting records	10 years, **the business's responsibility**	CSV and PDF export, full data archive
Subscription invoices issued by Nhill Solution	10 years	Nhill Solution's accounts
Platform administration log (team actions)	as long as the platform is operated; entries linked to a business deleted with it	append-only log

Data	Period	Implementation
Encrypted database backups	14 days on the server	`NH_BACKUP_KEEP_DAYS=14` (`/etc/nhill/backup.env`)
Copies of the server by the host	according to the host's cycle (2 weekly copies by default)	Hostinger panel
Off-site copy of the backups (if set up)	period chosen when it is set up, recorded in the register (document 18)	`NH_BACKUP_OFFSITE_CMD`
Technical server logs	90 days at most	journald `MaxRetentionSec=90day`; Caddy logs `roll_keep_for 2160h`

3. Deletion at the end of the contract

1. End of the subscription or the trial, then any grace period → the business switches to read-only; the account holder is invited to export the data.
2. 90 days after the end of full access → the team permanently deletes the business from the administration console; the deletion (date, author) is recorded in the administration log.
3. 14 days later → the data has disappeared from the backups kept on the server; it disappears from the host's copies and the off-site copy as they rotate.
4. On request, Nhill Solution confirms the deletion in writing.

4. Erasure requests

Handled according to document 19, within one month, unless the law requires keeping the data (in that case: limited retention, restricted access, the person is informed).

5. Review

This policy is reviewed once a year and with every new processing (register, document 18).
