Prospecting scripts (shop visit, call, WhatsApp voice note)

Français : ../fr/05-scripts-prospection.md

Principles: short, polite, concrete; talk about the trader's problem before the software; promise nothing Nhill does not do; ask for consent before recording a number for messages (template `legal/en/16-marketing-consent.md`). Adapt the language: French, Lingala or English depending on the person. Most visits in Kinshasa will be in French or Lingala; these English versions serve English-speaking prospects and partners.

The fields in braces are replaced at the time of the call or visit: `{sender}` = your first name; `{referrer}` = name of the person who recommended the contact (prospect tracker, `source` and `notes` columns). The other fields are described in `06-message-templates.md`.

1. Shop visit (2 minutes)

> Good morning Madam (or Sir), my name is {sender}, from Nhill. I'll only take two minutes — I can see you have customers.
> Nhill is software that lets traders keep track of their sales, stock and till on a computer, a tablet or a phone. For example, in the evening, you see how much each seller collected, without redoing the notebook sums.
> Does the evening till take you time, or do you sometimes have differences?
> *Listen. Ask 2 or 3 discovery questions (see `04` § 4).*
> We offer a 30-day assisted free trial, with installation and training. I can show you in fifteen minutes, with your own products, when you're less busy. Which day suits you?

If "I don't have time": "I understand. When can I come back: early or late in the week? Or I'll leave you this sheet, and if you allow me to write to you on WhatsApp, I'll also send it as a PDF."

If "it's expensive": "The 30-day trial is free and without commitment. Afterwards, you receive a written proposal suited to your business; nothing is invoiced without your agreement."

If "I'm VAT-registered": "Nhill doesn't replace your DGI standardised-invoice device. It helps with stock, the till and tracking sellers; you keep your device for the tax invoice."

If "what if the Internet cuts?": "Nhill needs the Internet to record. If the connection drops in the middle of a sale, you retry it and it isn't counted twice. For a long outage, keep a backup notebook; we enter it afterwards."

If "my data?": "It's yours. Each business is kept separate from the others in the database, and our team doesn't see your invoices or customers. You can export everything whenever you want."

2. Phone call (after a referral)

> Hello Madam (or Sir), {sender} from Nhill. {referrer} gave me your number and said you might be interested in a tool to track the till and stock. Do you have two minutes?
> *If yes:* How do you manage the till today? … I suggest a fifteen-minute demo at your shop, with your products. Tuesday or Thursday?
> *If no:* May I send you our presentation sheet on WhatsApp, if you agree? *Record the consent, date and channel.*

Only call if the referrer asked the person whether they agree to be called (document `legal/en/16`, § 4).

3. WhatsApp voice note (30 seconds, only with consent)

> Hello, it's {sender} from Nhill, thanks for agreeing. As promised: Nhill lets you see your sales, your stock and each seller's till, even when you're not in the shop. I'll send the presentation sheet right after. If you'd like the free demo with your products, just reply with a day that suits you. Have a good day.

4. After the contact

Step	Deadline
Enter the contact in `trackers/prospect-tracker.csv` (status, score, consent)	same day
Send what was promised (presentation sheet `marketing/visuals/export/trial-sheet-a5-en.pdf`)	within 24 h
Follow up if no answer	D+3, then D+10, then stop
